

PLANNED IMPROVEMENT OF THE ELECTRIC MOUNTAIN VISITOR CENTRE

We are pleased to announce our intention to improve the Electric Mountain Visitor Centre in Llanberis, North Wales during 2018/2019.

WHY REDEVELOP?

- Electric Mountain Visitor Centre has operated for over 30 years and is a major tourist destination.
- It hosts a number of community groups functions, and some major sporting events.
- However, the layout and facilities are no longer appropriate for a modern, appealing tourist facility and community asset.

WHAT WILL THE NEW VISITOR CENTRE OFFER?

- The new building will deliver an engaging and attractive visitor experience, providing user-friendly resources that will appeal to tourist and education visitors alike.
- These new facilities will be sustainably designed and in keeping with the local environment and landscape.

Any enquiries regarding the refurbishment can be emailed to us at: communityhelp@electricmountain.co.uk

WE'RE EASY TO FIND

We're only 15 minutes from the A55 Expressway and only about an hour from the M56, on the A4086 in the village of Llanberis, on the edge of beautiful Padarn Lake.

Electric Mountain

An amazing feat of engineering; a power station hidden inside a mountain. At Dinorwig Power Station – the Electric Mountain – water, gravity and man’s ingenuity work together to produce electricity. The largest man made cavern in Europe, 180 metres long, 25 metres wide and 60 metres deep, it could happily house St Paul’s Cathedral.

All aboard our Electric Mountain bus, hard hats at the ready as we begin the descent through the labyrinth of tunnels to the heart of Elidir Mountain where you will see secret sights you will be unlikely to forget!

“VERY INTERESTING FAMILY FRIENDLY TOUR”

“AWESOME INSIGHT INTO A UNIQUE POWER STATION”

Marvel at the sheer size of the massive inlet valve chamber (housing six mighty units), and see close up one of the world’s fastest response turbine generators – they go from zero to full power in seconds. Seeing is believing in this colossal power house of energy!
